### TOPICS OF THE DAY.

#### Greatest Single Crop.

Potatoes form the world's greatest single crop, 4,000,000,000 bushels being produced annually, equal in bulk to

#### the entire wheat and corn crops. The Wise Indian.

The government is to pay the Winnebagoes \$5,000,000 for their lands. It was a wise move for the Indians when they located in North America.

In Germany women are permitted to attend political meetings, but are debarred from speaking. This is keeping the promise to the ear, but dore Roosevelt." breaking it to the hope.

Keeping and Breaking.

#### Revenge at Last.

Chief Ne-te-ya-ka (the Man-Who-Loves-His-Booze), with some coppercolored friends visited every saloon in Lawton, Ok., the other day, bought a drink at every place and then informed the federal officials. Selling liquor to an Indian is dealt with se- patch to the presidents of the anverely, and thus Ne-te-ya-ka has se- thracite coal companies.-Theodore cured his revenge for a century of Roosevelt."

#### The Show of Playing War.

Kaiser Wilhelm's charge at the head of his cavalry was magnificent, but it was not war. If it had been war the kaiser would not have been at the head of his troops; neither would the artillery forces he routed have been firing theoretical shots. But, as Gen. Corbin remarked with unconscious humor, it was a fine military spectacle.

# A Curious Interpretation.

Rabbi Isidore Myers, of San Francisco, in addressing a meeting of the Federation of Zionists, gave a new in-terpretation of the design of the American, flag. Among his hearers were Jewish immigrants, largely Russians. He said: "Do you know why the stars and stripes are in the flag? I will tell you why. They show that America has stars for those who behave themselves and stripes for those who do not."

# When Figures Fall Down.

The American farmer is the great est man in the world. A "combine" with a capital of \$1,000,000,000 is a great thing because it is a combine, but \$1,000,000,000 relatively to the capital of money, brain and brawn invested in the agricultural industry in this country is not at all a great thing. Figures simply stagger and America, which is agricultural.

# Generosity, Old and New.

Much credit is given to the kindheartedness of the coal operators for allowing the striking miners to take coal without charge from the waste heaps around the mine shafts, This calls to mind the scripture story of Lazarus, who was permitfrom the rich man's table. The munificent generosity, it will be remembered, counted the rich man naught when the final reckoning was made,

# Farmers' Boys for Sallors.

The experiment which the government has been making in enlisting sailors for the navy from the interior of the country has been successful. Several hundred farmers' boys from Kansas, Iowa, Kentucky and Nebraska have been in training on the ships Lancaster and Hartford during the past few months, and their instructors say that they are making excellent sailors. Most of the boys got their first smell of salt water when they boarded the ships.

# Our Ex-Speakers Doing Well. Thomas B. Reed's name is not often mentioned in the public prints nowadays, but as the senior partner of

the firm of Reed, Simpson, Thacher & Barnum, the ex-speaker is making between \$30,000 and \$50,000 a year. the most money he has ever earned at Hanolulu and Guam. in his life; and it is said that he is quite happy in his new estate. Carlisle, another ex-speaker, is also doing famously at the law in Gotham. Ex-Speaker Joseph Warren Keifer is president of the Lagonda bank, of Springfield, O.

"Theirs Not to Reason Why." During the maneuvers near St. Petersburg recently a squadron of cavalry was ordered to charge, and galloped into a river, where 50 of the soldiers were drowned. "Theirs not to reason why, theirs but to do and die." The significance of such obedience on the part of the Russian soldiers will not be lost upon the European powers; and the cruel and uncessary sacifice of human lives, by showing of what stuff the Russian army is made, may prevent the slaughter of hundreds in battle.

# Not to Be Sneezed At.

St. Louis has a corner on all the pepper. This may be particularly un-fortunate, for with the corner on anthracite coal in Pennsylvania and the pepper corner in St. Louis, it will be impossible for people to keep warm inside or out. A St. Louis concern has obtained control of the entire pepper shipments that will arrive at New York between now and December 1-450 tons; and when it takes 2,500 tons to supply the territory of St. Louis alone, it will be seen that 450 tons are not to be speczed at.

# STRONG AGAINST TRUSTS.

lew York Democratic Platform Want Government to Own Anthracite Mines—Hill in Control.

Saratoga, N. Y., Oct. 2.-The com mittee on contested seats in the democratic state convention agreed to report to the convention against the seating of either the Devery or Goodwin delegates in the Ninth New York assembly district. All other contests were settled in favor of the so-called Hill delegations. In deciding the Devery contest a number result of the conferences between of heated speeches were made and when it was explained that it was Senator Hill's desire that neither Devery or Goodwin be recognized, a motion to that effect was carried with but few dissenting votes.

Bird S. Coler, ex-comptroller of Greater New York and the choice of ex-Gov. Hill, was nominated for gov-

The platform calls for steadfast fidelity to American principles, for the lack of which it arraigns the republican party; demands the return to the principles of Thomas Jefferson to stop demoralization of the country; opposes trusts that injuriously affect consumer and employer and drive out small manufacturers, and especially condemns the socalled beef and coal trusts for "unreasonably depriving the people of necessities of life." Restriction of the amassing of wealth is advocated and the amendment of the tariff law by placing the necessities of life on the free list is demanded. The money

question is ignored. The declaration regarding national ownership of anthracite mines is as follows: " We advocate the national ownership and operation of the anthracite coal mines by the exercise of the right of eminent domain with just compensation to owners. Ninety per cent, of the anthracite coal deposits of the world being in the state of Pennsylvania, national ownership can but be in the interest of the whole people."

#### ENOUGH FOR ALL:

Corn Crop of the United States Will Surpass All Records.

#### overnment Experts Estimate an Aggre gate of 2,500,000,000 Bushels-Value of Previous Crops-Only 24 Per

Washington, Sept. 30 .- Experts o the department of agriculture have been busy making calculations upon the addition to the wealth of the nation that is to be added by the harvesting of the corn crop of the present year. There is no longer any danger from frost. The work of gathering the early crop has been commenced in some sections, and the estimates on the year's production can now be made almost to the bushel. These estimates show that the record in the history of cereal productions is about to be broken. Figures are available now to show the crop for the present year will exceed 2,500,000,000 bushels, enough to supply the needs of the world for this year and next, even should there be a total crop failure in 1903. In 1900 the United States raised

2,000,000,000 bushels of corn; in 1901, 1,500,000,000 bushels. In 1896 the crop was near to the present bumper yield, making 2,286,000,000 bushels. Last year, because of the scarcity corn sold at excessive prices. In Kansas the farmers obtained 90 cents a bushel for the crop. The average price was 60 cents. The whole crop sold for \$929,555,768. In 1899, when the crop was twice as large, the price obtained by the farmers was \$629,210110. The value of the corn crops last year was \$10 an acre, while in 1896, the greatest corn year prior to this one, \$6 was the average price obtained by the farmers. In 1889 corn sold in some parts of the United States for 10 cents a bushel, the lowest price ever known. The corn crops of the United States are worth from \$600,000,000 to \$900,000,000 every year The exports average from \$175,000, 000 to \$200,000,000 annually, or one tenth of the yield. Only 25 per cent of the corn raised is exported from the states where it is grown. Some states never raise enough corn to supply the home needs. The middle west states are the principal corn producers. Illinois is the principal exporter.

## MAY SEIZE THE MINES.

hortage of Anthracite Coal at the Nation al Capital Menaces Public Business-All Departments Are Involved.

Washington, Sept. 30 .- Matters are very rapidly approaching a crisis in coal situation in Washington, not only with the private consumers Frisco railway \$2,200 for its refusal but with the government. But little to grant such transportation. This attention was paid a few weeks ago, order of the board applies to all when representatives of the different departments began complaining that there was not enough fuel in sight to keep the buildings lighted and heated for more than a few weeks.

If there is no fresh supply of coal before the time for the meeting of congress, the legislative body may not be able to hold its sessions. The capitol depends upon electricity for ing the certificate of incorporation illumination, a lighting plant being established in the building. It requires 10 or 12 tons of coal a day to run this plant. The senate consumes about 4,000 tons a year, and the house of representatives a greatcapital of \$120,000,000, of which onembarrassment of the government through the shortage of fuel may, it is said, precipitate the question of the seizure of the mines.

# MORO STRONGHOLDS TAKEN. PAID

The American Troops Driving Out the Insurgents from Their Forts—No Casual-ties Among Our Soldiers.

Manila, Oct. 2.-The Maciu Moros in Mindanao have offered but slight resistance to the column under Col. Pershing, of the Fifteenth cavalry. After a series of skirmishes on Monday and Tuesday of this week the Moros retreated into six forts on the shores of the lake. When a courier left Maciu Tuesday for Camp Vicars Capt. Pershing was preparing to assault the last Moro stronghold. The American column reached the former camp at Maciu Sunday night. On Monday the Moros opened fire on them with a brass cannon and rifles from a series of new forts which had been erected since Capt. Pershing's first visit to the place. The battery under Capt. McNair scaled a ridge commanding the position of the Moros and shelled them out. The engineers under Capt. Morrow had constructed a trail over the swamp flanking the Moro position. The men of Capt. Pershing's column crossed the swamp by the trail and captured and destroyed three of the Moro forts. The Moros stood but a short while and ran as soon as the artillery opened on them. Twenty Moros were killed. There were no casualties among the Americans.

TO SOLDIERS.

Interesting Statistics from the United States Pension Office.

Since the System Was Established in 1790 the Government Has Pald Out \$2.992,-509,010 to Soldiers, Their Widows and Orphans.

Washington, Sept. 29 .- The annual report of the commissioner of pensions, Eugene F. Ware, made public yesterday, shows that the number of names on the pension rolls still is under the million mark, despite a net gain of 5,732 pensioners since 1898. The total enrollment July 1 last was 999,446, against 997,735 last year. The total comprises 738,809 soldiers and 260,637 widows and dependents. The aggregate includes 4695 pensioners outside the United States.

The number of death notices of old soldiers, not now in the service, received by the bureau during the year was 50,128, but only 27,043 of them were pensioners.

The report says that the death rate among the pensioners for the coming year will be about 40,000 and the losses to the rolls from other causes will be about 6,000. The total amount paid for pensions during the fiscal year was \$137,504,268 and the yearly cost of operating and maintaining the bureau and the agencies outside of the payment of pensions proper aggregates \$3,590,529. The pension system, says the report, since the beginning of the government has cost \$2,992,509,019, exclusive of the establishment of the soldiers' homes, The pension disbursements by the United States from July 1, 1790, to June 30, 1865, were \$96,445,444.

The following amounts have been aid to soldiers, their widows, minor children and dependent relatives on account of military and naval service during the wars in which the United States has been engaged: Revolutionary war (estimated),
